

SproutBox

Farm-to-Fork. Door to Door.

A demand-driven, decentralised microgreen production and supply platform — connecting restaurants with home-based growers for the freshest produce, delivered on schedule.

The Problem

India's restaurant supply chain for fresh specialty produce is broken.

No Reliable Source

Supply is fragmented across scattered vendors — no standardisation in quality, quantity, or timing.

Produce Loses Value Fast

Microgreens lose nutrition within 24–48 hours of harvest. Long supply chains mean kitchens receive produce past its best.

Growers Have No Platform

Thousands of home-based growers have the space and willingness — but no structured system to monetise it.

No Quality Accountability

No standardised multi-stage QC for hyperlocal supply. Restaurants have zero visibility into origin or growing practices.

Demand & Supply Disconnected

Restaurant demand is predictable and recurring, yet no platform intelligently matches it with distributed production capacity.

The Solution

SproutBox bridges the gap between restaurant demand and decentralised home-based production — intelligently, at scale.

From order placement to doorstep delivery, SproutBox orchestrates every step — ensuring freshness, accountability, and reliability for both growers and restaurants.

94% QC Pass Rate

₹50+ Per Tray Payout

7–10 Day Cycle

PRODUCTION-READY ON VERCEL

Tech Stack

Built for speed, scale, and reliability —
every layer chosen for developer
experience and production performance.

→ Frontend

Next.js 14 · React 18 · TypeScript · Tailwind CSS ·
shadcn/ui

→ Payments & Uploads

Stripe (webhooks) · UploadThing for milestone images

→ Backend & Data

PostgreSQL (Neon) · Prisma ORM · NextAuth v5 · RBAC
for 3 roles

→ Deployment

Vercel · GitHub Actions CI/CD · Docker-ready for
GCR/GKE

System Architecture

Three roles. One intelligent platform. End-to-end traceability from sowing to delivery.

Restaurant

Places orders,
tracks deliveries,
leaves grower
feedback.

Runs demand
engine, manages
allocation & QC,
handles hubs &
payouts.

End-to-End Flow

Restaurant places order → Demand engine converts kg to trays (+25% buffer) → Score-weighted algorithm allocates to growers → Growers follow guided instructions and upload milestone images → Admin reviews digital QC → Approved batches dropped at local hub → Physical QC and aggregation → Delivery dispatched → Restaurant feedback updates grower composite score → Better allocation next cycle

Grower Score Formula: (Yield Accuracy × 40%) +
(Quality Pass Rate × 40%) + (Timeliness × 20%)

Business Model Canvas

STRENGTHS

WEAKNESSES

OPPORTUNITIES

THREATS

Revenue & Growth

- **Primary:** Commission on each fulfilled restaurant order
- **Future:** Grower kit sales — Starter, Standard (₹999), Pro (₹2,499)
- **Future:** Premium restaurant subscription tiers
- **Future:** Data & analytics layer for B2B food-tech partners

Currently live in 3 cities with expansion planned. Multi-language support in English, Kannada, and Hindi.

What Our Partners Say

"SproutBox has completely changed how we source microgreens. The quality is consistent, the delivery is on time, and our chefs finally have a reliable supplier they can trust."

— **[Restaurant Partner Name]**, [Restaurant Name], [City]

★ Quality

Multi-stage QC ensures only the freshest batches reach the kitchen

🕒 Reliability

Recurring delivery subscriptions mean zero last-minute scrambling

📊 Transparency

Real-time tracking from sow to delivery — full visibility always

GROWER VOICE

Earning from Home, Growing with Purpose

"I started with just 5 trays in my balcony. SproutBox guided me through every step — from sowing to harvest. Now I earn a steady income every week without leaving home."

— **[Grower Name]**, Home Grower,
[City]

Low Barrier to Entry

Start with just 5 trays — no prior farming experience needed

Guided Every Step

Day-by-day instructions and milestone prompts remove all guesswork

Performance Pays Off

Higher scores unlock more tray allocation and bigger payouts over time

Traction & Growth

Early numbers from a live, deployed platform — growing week on week.

Expansion underway

Platform Velocity

- Weekly output growing at **18% month-on-month**
- Task allocation response time under **10 minutes** from order confirmation
- Grower onboarding from just **5 trays** — lowest barrier in the market
- Recurring weekly and biweekly delivery subscriptions now active

Our Microgreens

Six varieties. Farm-fresh. Delivered on schedule.

Sunflower Shoots

9-day cycle · ₹450/kg

Pea Shoots

8-day cycle · ₹380/kg

Radish

7-day cycle · ₹320/kg

Wheatgrass

10-day cycle · ₹400/kg

Mustard Greens

7-day cycle · ₹350/kg

Fenugreek

8-day cycle · ₹360/kg
